Summary

Frontend Engineer with 3+ years of experience building production web applications and data-intensive enterprise platforms using React. Experienced in translating complex business requirements into high-performance interfaces, implementing role-based access control (RBAC), virtualized data tables, and reusable UI components.

Experience

Frontend Engineer May 2023 – Dec 2025

Engineerforce Co., Ltd.

- Built and maintained React-based applications for enterprise clients, translating complex business requirements into production-ready frontend workflows
- Developed reusable UI components and frontend patterns to maintain consistency across complex business workflows
- Optimized existing React applications through code splitting and memoization, improving application responsiveness and reducing initial bundle size
- Collaborated with backend engineers and designers to deliver and iterate on production features across multiple product areas

Frontend Developer Oct 2022 – May 2023

App.com.mm

- Developed React-based ERP dashboards and Progressive Web Apps (PWAs) to support business operations
- Implemented authentication flows and role-based access control (RBAC) to manage user access and permissions across application workflows

Projects

Client & Store Management Platform | *React, Redux Toolkit, RTK Query, Material UI* Sep 2023 – Dec 2025

- Developed a drag-and-drop form builder supporting configurable input types and reusable templates
- Implemented configurable role-based access control (RBAC) for 7 platform roles and 5 client roles, including permission-aware actions and field-level data visibility
- Built data-intensive tables with search, filtering, and column controls, using TanStack React Table and row virtualization to efficiently render datasets containing 1,000+ rows
- Implemented file management workflows including CSV import/export, document preview, and downloads

Ad Ordering & Distribution Platform | *React, Redux Toolkit, RTK Query, Material UI* Jun 2024 – Dec 2025

- Developed map-based advertising workflows using Google Maps API and GeoJSON for geographic region selection, radius-based targeting, and distance validation
- Built a multi-step ordering workflow supporting file uploads, coupon usage, and payment processing
- Implemented order tracking interfaces for users and administrators to monitor order status and progress
- Developed role-based administrative interfaces for managing users, orders, notifications, coupons, campaigns, and platform settings

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: React, Redux Toolkit, RTK Query, Material UI, React Hook Form, TanStack React Table
Tools & Technologies: REST APIs, Cypress, Git, Vite, npm

Education

Dagon University Yangon, Myanmar

Bachelor's Degree in English *2016 – 2020*

Certifications

Certificate in Frontend Development 2022

MMS International
