SUMMARY

Frontend Engineer with 4+ years of experience building production-ready web applications and enterprise platforms with React. Experienced in complex business logic, role-based access control, data-heavy interfaces, reusable component systems, and API-driven workflows.

EXPERIENCE

Frontend Engineer

May 2023 – Dec 2025

Engineerforce

- Built and maintained React-based SaaS applications for enterprise clients, translating complex business requirements into production-ready frontend workflows
- Developed reusable UI components and frontend patterns to maintain consistency across complex business workflows
- Improved frontend performance across existing applications through targeted code and architectural optimizations
- Collaborated with backend engineers and designers to ship and iterate on production features across multiple product areas

Frontend Developer

Oct 2022 – May 2023

App.com.mm

- Developed React-based web applications including ERP dashboards and Progressive Web Apps (PWAs), for business operations
- Implemented authentication flows and role-based access control (RBAC) to manage user-specific permissions across application workflows

PROJECTS

Client & Store Management Platform | *React, Redux Toolkit, Material UI*

Sep 2023 – Dec 2025

- Developed a drag-and-drop form builder enabling authorized users to create reusable templates with configurable forms and input types
- Implemented configurable role-based access control (RBAC) for platform and client administrators, including permission-aware actions and field-level data visibility
- Built data-intensive tables using TanStack React Table with filtering, search, column controls, and row virtualization for large datasets
- Implemented file management workflows including CSV import/export, document preview, and downloads

Ad Ordering & Distribution Platform | *React, Redux Toolkit, Material UI*

Jun 2024 – Dec 2025

- Developed map-based advertising workflows using Google Maps API and GeoJSON for geographic region selection, radius-based targeting, and distance validation.
- Built a multi-step ordering workflow supporting file uploads, coupon usage, and payment processing
- Implemented order tracking interfaces for users and administrators to monitor order status and progress
- Developed role-based administrative interfaces for managing users, orders, notifications, coupons, campaigns, and platform settings

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML, CSS

Frameworks & Libraries: React, Redux Toolkit, Material UI, React Hook Form, TanStack React Table

Developer Tools: Git, Vite, npm

EDUCATION

Dagon University

Bachelor's Degree in English

Yangon, Myanmar

2016 – 2020

CERTIFICATIONS

Certificate in Frontend Development

MMS International

2022
